

Update on 21CN Voice Strategy Roadmap

Niall Tanner – Head of Business Analysis

BT's 21CN programme is subject to consultation and further development. Dates and other details in this document should be treated as indicative only, and subject to change.

Agenda

21CN

- Product Definitions
 - . WLR
 - . WBCC
 - . WVC
- Product Migration
- Questions

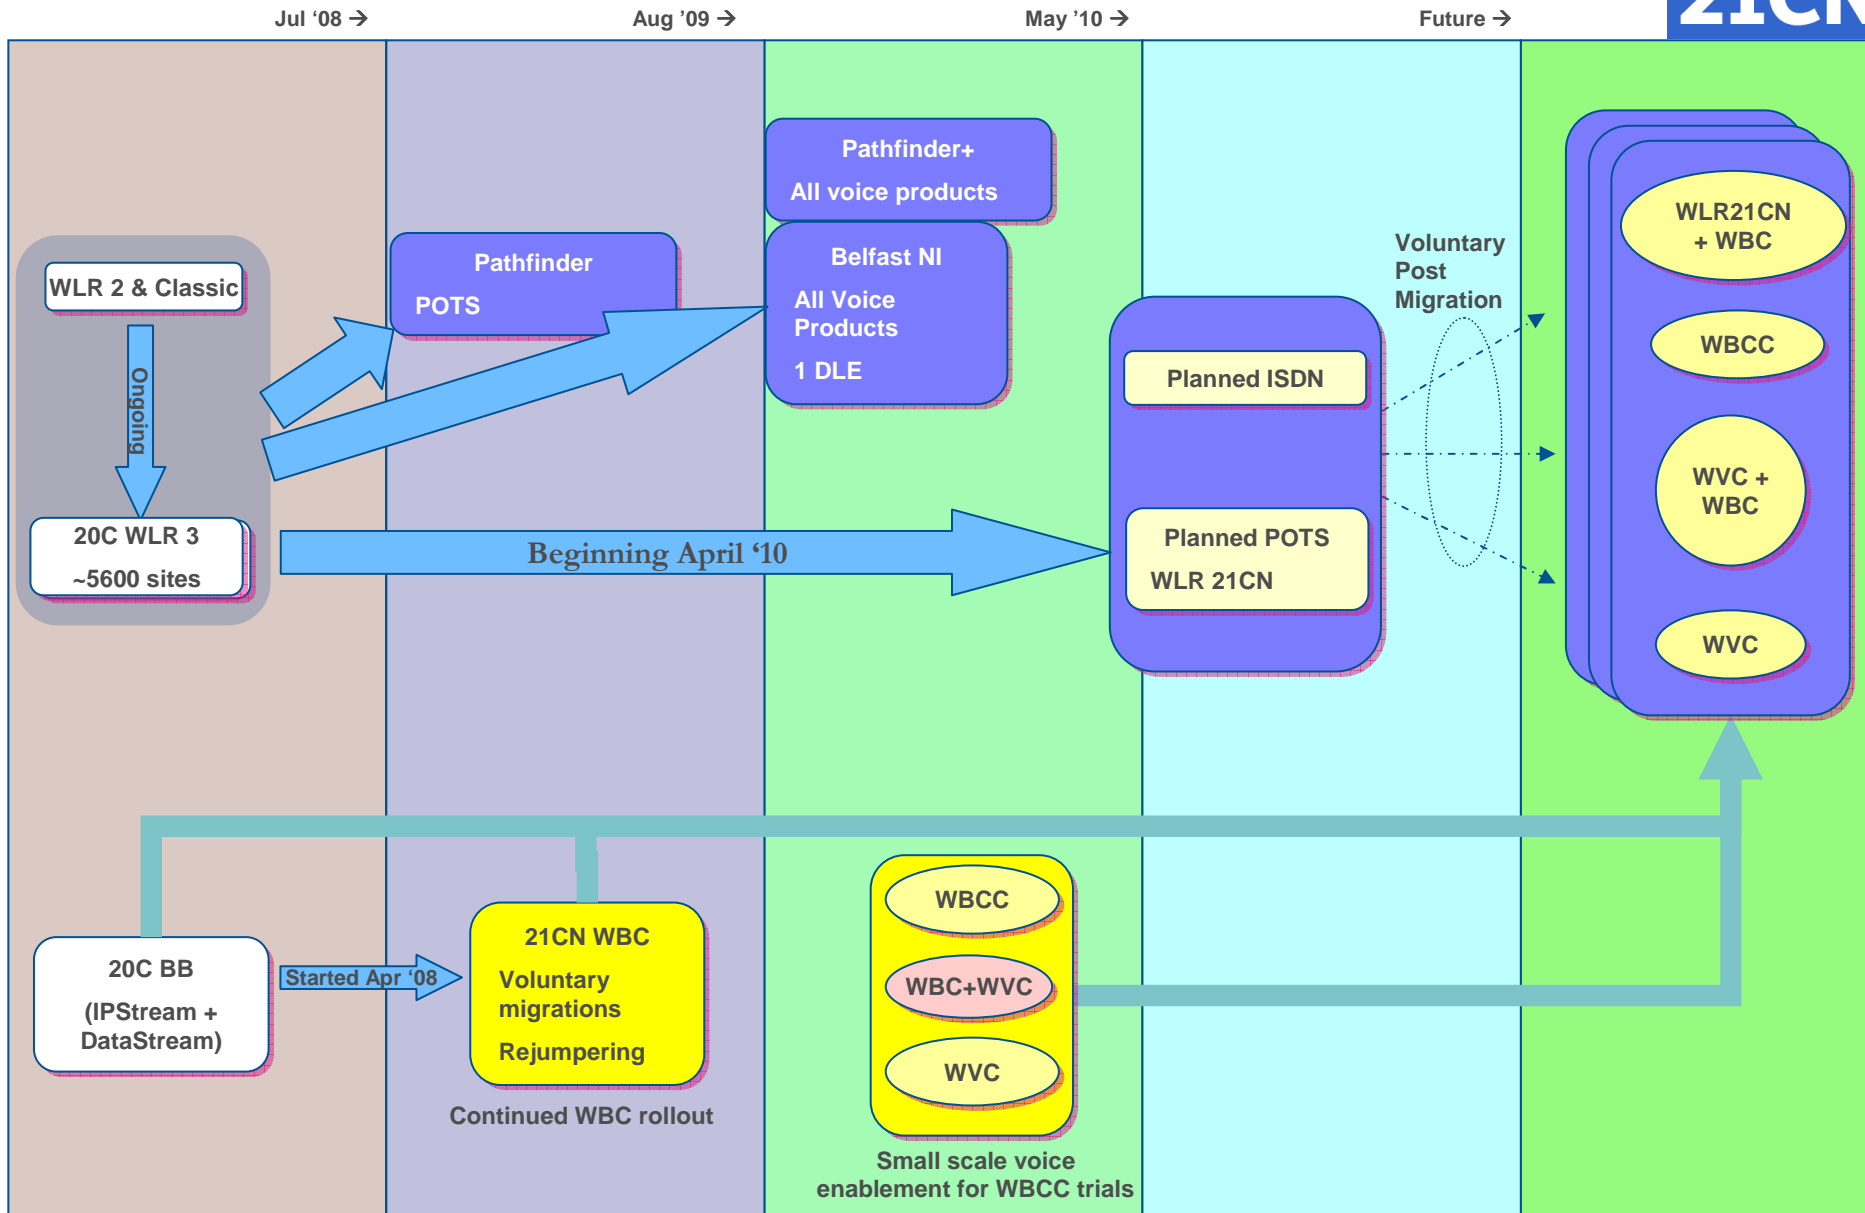

Voice Products - Definitions

- Openreach's Wholesale Line Rental (WLR) enables CPs to offer their own-branded telephony services over the Openreach network. WLR will be migrated to 21CN from April 2010
- Wholesale Broadband Connect Converged (WBCC) offers CPs a packaged end-to-end converged voice and broadband service. It provides flexibility for CPs to differentiate in broadband / voice features, overlay and integrate next generation SIP based applications, and call packages.
- Wholesale Voice Connect is the voice only variant of WBCC that will offer CPs an alternative to WLR plus Wholesale Calls / Carrier Pre Select (CPS) allowing for the voice service to be defined and delivered by their owned or managed network while the Broadband is supplied independently.
